**New 7th Edition Changes!**
- **No more underlining:** Titles of larger works (books, magazines) are now italicized; titles of smaller works (poems, articles) are put in quotations.
- **No more Web sites:** URLs are no longer necessary in a Works Cited list.
- **Continuous page numbers:** You no longer have to worry about whether or not a scholarly journal has continuous pagination. Always provide the issue number when there is one available.
- **Medium format:** Every entry must include the medium of publication. Usually Print or Web, for others check with the handbook.
- **New abbreviations for electronic resources:** Use n.p. when no publisher is given; use n.d. when no date of publication is given; use n.pag. when no pagination is given.
- **No more library information:** If an article is retrieved from an online database, cite the database name in italics (ex. *JSTOR*).

### Print Resources

## Electronic Resources  
### Works Cited List

**E-book**  

**Web site**  
*Note: The first date is the date of publication; the second is the access date. An edition or version can also be given after the Web site title.*

**Journal Article**  

**Newspaper Article**  

### Parenthetical Citation

In MLA style, in-text documentation is done through parenthetical citation, allowing the reader to locate the source in your Works Cited list. As a general rule, keep parenthetical citations as brief as possible, and try to incorporate most of the information into the text.

**Basic Forms:**

- According to Gullans in his book *Poetic Form*, the importance of structure... (23).
- *Page number only, when author and work is evident from text*

- In the book *Poetic Form*, importance of structure... (Gullans 23).
- *Author and Page, when only work cited is evident from text*

- ...importance of structure (Gullans, *Poetic Form* 23).
- *Author + Title + Page, when none is evident from text*
